ClassicVue Max[®]

ALUMINUM NON-IMPACT WINDOWS AND DOORS

By MITER Brands[™]

ALUMINUM

WHY WE'RE THE RIGHT CHOICE.

ClassicVue® Max windows and doors offer a lasting blend of beauty and durability, making them a trusted choice for homeowners for years to come. Designed to perform in demanding environments, they deliver reliable strength, quality, and low-maintenance performance.

Designed to deliver lasting quality and easy maintenance

Our aluminum products are engineered for the highest quality and durability. Designed to fit any style of home with the most customized glass and frame options available.

EXPERIENCE IS EVERYTHING

Our experts match you with attractive, reliable windows and patio doors that best fit your home, your needs, and your price point.

CONFIDENCE TO CREATE

We deliver the highest-quality windows and patio doors through our passion for craftsmanship and a relentless pursuit of 100%.

ENGINEERED FOR HERE

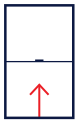

Our teams know the challenges that homes here face, because we live and work here too.

Elevated style. Designed for customization.

Each PGT® ClassicVue Max® product is built just for you and can be fully customized to live up to your highly unique design vision — without compromise, down to the last detail.

CUSTOMIZE IT

Options for you

Choose between a collection of frame finishes and a wide array of glass colors, coatings, and types.

Innovation for a lifetime

PGT® has led the industry for more than 40 years, and with more than 8 million units installed, we're America's authority on laminated glass.

INSULATING GLASS

OUTSIDE PANE

Single pane of glass that increases a window's insulating properties while maintaining clear sightlines.

THERMOPLASTIC SPACER (TPS)

Our unique TPS spacer and sealant system is air-tight, maintaining the thermal insulation and preventing condensation and seal failures.

INSULATING AIR SPACE

The layer between the outside pane and inner glass pane acts as a barrier that slows heat transfer and dissipates sound. Argon gas can be inserted for even greater energy efficiency.

INSIDE PANE

Single pane of glass that increases a window's insulating properties while maintaining clear sightlines.

HEAVY DUTY ALUMINUM

Highly resistant to outdoor elements, our extruded aluminum frames are exceptionally durable and require little maintenance.

MECHANICALLY FASTENED CORNERS

Provide added strength and resistance to warping and other damage.

Energy Efficiency Upgrade

Optional coatings and insulating glass can achieve a higher level of energy efficiency. Speak to your local dealer for more information.

Hours of Testing

Our team oversees each step of the glass production process and tests finished batches multiple times per day to ensure the final product meets the highest standards

Accredited & Approved

ClassicVue Max® products are continuously validated by our industry's accredited organizations. The certifications we earn are your assurance that our products will perform as expected.

Certifications & Ratings

National Fenestration Rating Council
Miami-Dade Notice of Acceptance (NOA)
Florida Product Approval
Texas Department of Insurance

Meets or exceeds the Fenestration Testing Requirements specified in the International Building Code.

Made to perform beautifully

With ClassicVue Max® windows, every day is a breeze. Designed for easy operation and low-maintenance care, these non-impact products are available in a wide range of styles to complement your home's interiors and curb appeal.

THINGS TO CONSIDER WHEN CHOOSING YOUR WINDOW STYLE

Operating style. When we talk about an operating style, we are referring to whether or not the window opens to allow ventilation or, is an inoperable picture window that only allows light to come in. Each room in your home may have a different window need.

Security and privacy. When purchasing non-impact windows and doors, security and privacy remain important considerations. Choose products with sturdy locking mechanisms and well-built frames to help safeguard your home from unwanted entry. For added privacy, options like obscure or tinted glass can limit visibility from outside while still allowing natural light in. By selecting windows and doors that offer reliable security features and privacy solutions, you can create a comfortable, safe, and peaceful living space.

Location. Think about each room individually. First floor windows may differ from second or third floor windows regarding the size, where they are placed on the wall, and how they open. First choose where you want the window to be, and then think about what you want it to do.

Ease of use. Look for features that make operation and cleaning simple. Consider the accessibility for all members of your household, as well as maintenance requirements. Choosing windows and doors that are easy to operate and maintain will enhance your daily comfort and ensure long-term satisfaction with your investment

Quality and durability at every angle

Our remarkable doors are designed for long-lasting beauty and exceptional performance. Enjoy the view every day and for years to come with these sturdy, stylish additions to your home.

THINGS TO CONSIDER WHEN CHOOSING YOUR DOOR STYLE

Purpose and Location. Start by considering the door's primary function and where it will be installed. Is it an entry door, patio door, or interior passage door? Entry doors should prioritize security, durability, and weather resistance, while patio and interior doors may focus more on aesthetics, light, and access.

Security and Privacy. When considering non-impact doors, security and privacy are still essential factors. Look for doors with strong solid construction to help protect your home from unwanted entry. For added privacy, options like obscure, tinted, or decorative glass can limit visibility from outside while allowing natural light to brighten your space. By choosing non-impact doors with enhanced security features and thoughtful privacy solutions, you can enjoy both peace of mind and comfort in your home.

Customization and Design Flexibility. Consider color, finish, hardware, and grid options to match your home's décor. Doors with large glass panels can maximize natural light and outdoor views, ideal for patios or living spaces. Solid doors or those with minimal glass provide more privacy and insulation.

Energy Efficiency. Features like insulated glass, Low-e glass coatings, and weatherstripping can improve comfort and reduce energy costs.
